Good
Meals

at Camp Comfort

The boys at Camp Comfort are using the same stove that they had last year. It was the best they could get. It was a

**New Perfection
Oil Cook-stove**

This year they got a New Perfection Oven Also a New Perfection Toaster Also a New Perfection Broiler

"Gee, what a difference in the meals a good stove makes," said one of the boys. And they will tell their mothers and wives about the stove, too. For the New Perfection Oil Cook-stove is as convenient for the home as for the camp. It will bake, broil, roast and toast as well as a regular coal range.

The New Perfection Stove is handily installed in kitchen, with cabinet top, drop shelves, bowl rack, etc. Long chimneys, seamless, rustless, blue. Made with 12 or 14 burners. All dealers. Free Cook-Book with every stove. Cook-Book also given to anyone sending 5 cents to cover mailing cost.

VANCOUVER CADETS PERFECTLY ORGANIZED FOR LONG JOURNEY

High School Lads Representing Dominion Have Been Drilled and Trained for Tour of Australia and Are Well Equipped for Work They Have in Hand.

The Vancouver cadets who recently visited Honolulu enroute to Australia under the command of Captain R. N. Davy are said to form one of the best drilled and equipped organizations of the kind in existence. In speaking of their work and plans a Vancouver correspondent says:

"This youthful military body is well organized for the work they have to carry out. All the officers have a particular duty to perform and it is their task to see that this work is properly done."

"The corps goes well drilled in military tactics and need have no fear of being outdone on that score. For the past three months the boys have been drilled by Sgt-Major Coffin of the Department of Militia and Defence. Every day after school the corps could be seen marching up and down the school campus. Some days they imagined that an enemy was preparing to attack them from the rear of the school. They were at all times prepared to meet them in this mimic warfare, and of course were always the victors."

"The band under the able direction of Drum-Major Mackinlay and Bugle-Major R. A. Hunter has won a name for itself across the continent. The martial strains they pour forth when on the march makes every one's blood tingle with eagerness to be at the front. The lads have lately received rifles from England and by the time they arrive in Australia will be able to play these instruments as well as they now play the trumpet."

"The corps has won many prizes. In every competition in which they have entered they have at all times been ranked with the winners. In shooting the youthful marksmen, under the guidance of Lieut. A. B. M'Gee, now at Bisleigh, have become the most known in the Dominion."

"The trophies that the corps has in its possession are varied and handsome. Old cadets and friends of the

cadets have shown their loyalty to the organization by presenting the corps with cups, rifles and medals. Some become the property of the cadet while others are competed for annually."

"The business manager of the tour, Drum-Major Mackinlay has his department well organized. All the business connected with the corps while on tour will pass through his hands. He has charge of the executive staff, which is a task in itself. The band also comes under his direction and it is his duty to twirl the drum-major's baton at the head of all parades."

"Officers in Charge. Cadet Captain R. A. Seymour, Lieutenant A. S. G. Richards and Lieutenant H. Nickson have charge of the military affairs of the corps. Sgt-Major R. G. J. Richards is also connected with the senior officers."

"The medical needs of the lads will be looked after by Lieutenant Gibson of the Eighteenth Ambulance Medical Corps. He is a military man of high standing and is already a favorite with the boys."

"When a question is asked about Canada that a cadet is not familiar with, and they will be few, he need only ask the Intelligence Department, under the charge of Sgt. Noble, and the question will be immediately answered. This department has all the statistics which the various provincial governments give out. Information about every part of the Dominion is being taken in this department."

"The corps has an orchestra of which it may well be proud. The orchestra and all other musical arrangements are being looked after by Bugle-Major R. A. Hunter, a musician of ability. He composes nearly every march that the trumpets play. The lads can sing 'The Maple Leaf Forever' and all the other patriotic Canadian songs with an enthusiasm that will demand attention from their hosts on the tour."

BOY SCOUTS FIGHT DISEASES AND BUGS IN TREES AND SHRUBS

New Chapter in Manual Will Teach Them Another Phase of Real Scouting — They Will Be Instructed How to Detect Insects and Cure Trouble.

NEW YORK—Boy Scouts of America are doing a piece of real and extremely useful scouting. They are searching for trees that are afflicted with disease or insects. This work was started in Pennsylvania where a disease is destroying thousands of chestnut trees. The boys have been of great help to the Forestry Department in detecting this disease and reporting the trees thus afflicted to the Department of Forestry.

That work afforded an excellent piece of scouting for boys and the result has been that boy scouts throughout the country have written to James E. West, Chief Scout Executive of the Boy Scouts of America asking for information about other diseases and insects that affect trees and shrubs. They wanted something definite to look for in their hikes through the woods and in their camping expeditions.

Preparing Manual. As a result George H. Merritt, one of the secretaries employed by the Boy Scouts of America is compiling with the aid of Gifford Pinchot, former United States Forester and mem-

ber of the National Council of the Boy Scouts of America, a chapter for the manual and for the scoutmasters outlining different diseases of the most significant trees. Boys also are being taught what diseases of the trees and what plants are likely to prove harmful to themselves.

This work will train the observation powers of the boys by keeping them alert. They will watch the trees and the shrubs more closely and through alertness they will appreciate beauty of the trees and of the surroundings and they will gain many beneficial results from that work.

Seek Destructive Insects.

"Among the most destructive insects," said Merritt, "must be enumerated the bark lice or scale insects, plant lice, wood borers, codling moth, San Jose scale, tent caterpillars, canker worms, tussockmoths, leaf-mining beetles, gall-forming insects, chinch bugs, army-worms, weevils and locusts. Aside from this army of destruction to forest and orchard tree alike, and to the lesser plants, there are also causes of loss due to such agents as

SOME WORKING GIRLS LOSE TOO MUCH TIME

Two Girls Tell How To Avoid It.

There is nothing that teaches more than experience. We therefore quote from the letters of two girls who suffered and were restored to health. The same remedy is within reach of all.

Brooklyn, N. Y. — "Prior to taking the first bottle of Lydia E. Pinkham's Vegetable Compound I suffered agony every month, but after your wonderful medicine had been taken a while I felt a little better, and after taking seven bottles of it I feel that I can truly say I have no more pain or inconvenience."

"As I am out in the business world as a stenographer, I come in contact with many girls, and when the opportune moment arrives I tell them about the Vegetable Compound and I know that quite a few are taking it." — HELEN CANET, 556 Dean St.

Another Girl's Experience.

Tishomingo, Okla. — "I am a stenographer and book-keeper, and Lydia E. Pinkham's Vegetable Compound has saved my life. I am enjoying the best of health now, but I was suffering from female troubles and painful periods, and would have backache, headache and fainting spells. If any woman would like to write to me I will gladly answer her letter and tell her what Lydia E. Pinkham's Vegetable Compound has done for me." — Mrs. MATTIE COPELAND, Tishomingo, Okla.

fungus, animals, weather conditions, etc.

"The Boy Scouts, I think, can be of material service in doing real scouting in locating cases of blighted trees or of those badly affected by insects, feeders and parasites. The real information as to methods of such work will depend largely, of course, upon local or sectional conditions, and vary also with the cause, but with a little care all of this can be worked out into a very good department of Scout work. Most information as to exact causes, kinds of disease and insect troubles, methods of treatment, location, etc., will come from the various districts of the United States where government entomologists and botanists have been stationed."

BAND CONCERT.

The Hawaiian band will give a public concert Sunday afternoon at Kapiolani park at 3 o'clock, with the following program:

Old Hundred Grand March Kapiolani Park, Larger Overture, Rosamunde Sachubert Miserere, Il Trovatore Verdi Reminiscences of Rossini Godfrey Vocal, Hawaiian Songs, as by Berger Selection, American Melody, Conterno Fantasia, In Switzerland Hume Finale, Our Director Bigelow The Star Spangled Banner.

Preliminary plans for the construction of the new penitentiary at Kapiolani, near the Thomas Pineapple Cannery, are now under way and as soon as the \$75,000 appropriation is available from the new bond issue active work will start on the structure. Some additions to the main building are planned, and more land will be required than had been originally planned for, but these are to be acquired by the sale or exchange of other government property, without drawing more than the allotted sum from the new bonds.

ALAKEA AND BERETANIA

KRYPTOK LENSES

Why Look Older Than You Are?

The gentleman to the right of the reader (sketched from life) is wearing old style or pasted double-vision lenses. The lines of the reading wafers are noticeably prominent and he has difficulty in adjusting his eyes to the lenses. The cement used to join the two lenses has become clouded and has made his glasses misty.

The two figures to the left (sketched from life) are wearing Kryptok double-vision lenses. There are no seams on these glasses, because the reading lenses are fused invisibly within the distance lenses. These latter two persons are at ease; look dignified and comfortable.
